

Eureka Filing Solutions has a range of files that are cost effective in replacing suspension pockets and lever arch files.

Constructed from locally produced heavy duty board, Eureka file folders are designed to withstand the heaviest punishment and are scored to expand to 35mm to accommodate 300 sheets of paper. Each file is printed with the end user in mind: an aesthetically pleasing layout of title boxes, note panels and movement records to suit every application.

FF1

FF1 - Heavy Duty 450um board. Extended front cover to protect contents as file expands. Useful for thicker files. 35mm Expansion.

FF2

FF2 - Heavy Duty 450um board. Compact dimensions for optimum space utilization. 35mm Expansion.

FF4

FF4 - Heavy Duty 450um board. Versatile - grab flaps along 2 side allow both lateral and drawer filing.

FF7

FF7 - Heavy Duty 450um board. Same as an FF1 but with internal left hand pocket with 10mm expansion.
