

EZI CLIP

SECURE WITH EASE

filecorp

NZ Limited

EZI 3 PART CLIP

- Designed to operate using the same principles as a lever arch file.
- Easy to access records without removing them from the file.
- File lies flat when photocopying.
- Uses minimal space.
- Improves security of file contents.
- Components are on the inside of the file, eliminating catching on other files.
- No torn documents.
- Adhesive base has extra long tubing compared to others in the market, making it easier to fasten and increasing the capacity of the file.

ALTERNATIVE FASTENERS

Self Adhesive 2 Hole Fastener

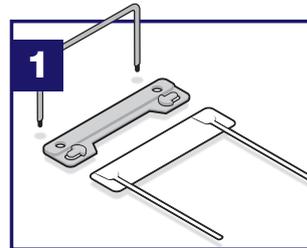

140mm - capacity 20mm / 200mm - capacity 50mm.

- Self adhesive base with plastic coated prongs.
- Supplied with prong length of 140 or 200mm.
- The self adhesive base enables the clip to be positioned within the file.
- The pressure pad protects the punch holes from tearing.

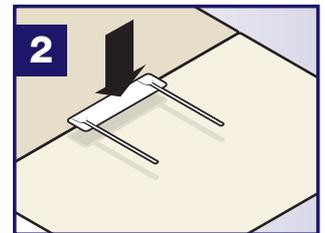

Self Adhesive Corner Pin Patch

Pin not included.

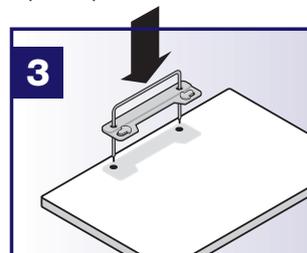

- The patch is strong and prevents the pin holding the documents from breaking free from the file.
- No part of the clip projects through the file.

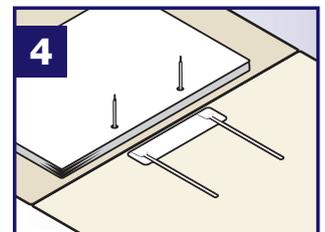

1 The U piece, pressure bar and adhesive base make up the 3 part clip.

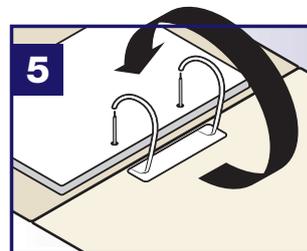

2 Position adhesive base between the guide marks inside the file and press firmly.

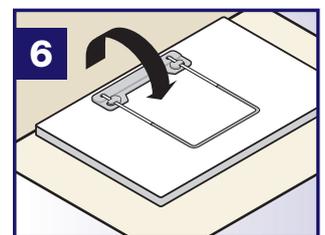

3 Thread the U piece through the pressure bar and documents.

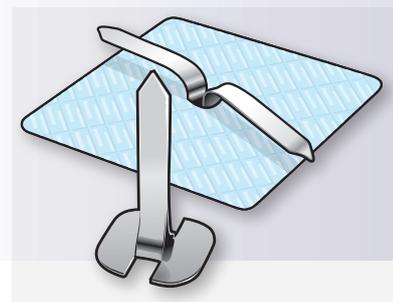

4 Lay the documents face down next to the adhesive base.

5 Bend the tube round to fasten to the U piece.

6 Pull your paper through and fasten with the pressure bar.
