

STOR RITE

ARCHIVING MADE EASY

filecorp

NZ Limited

- A wall of storage boxes can be built anywhere without the need for shelving.
- When stacked the 3500E boxes on the bottom can be opened to retrieve the contents without being moved.
- The maximum weight of any full box is only 7kg, reducing the risk of injury when lifting.
- Label positioning guides enable the box to be read whichever way the boxes are stacked.

3500E END OPENING BOX

- End opening.
- Suitable for archiving File Rite lateral files.

TRANSFER DEVICE

- Eliminating the frustration of threading individual documents.
- Transfers files with ease.

DOCUMENT WRAP

- Designed to hold inactive documents securely.
- Quick & easy access without tearing the document.
- Expands to 60mm.

4000T TOP OPENING BOX

- Top opening.
- Suitable for archiving document wraps, TAB Top, lateral or Lever Arch Files.

1500S BOX FILE

- Side opening.
- Label positioning provided.
- Takes up to foolscap size, compatible with File Rite lateral files.
- Available with or without print.

3000T TOP OPENING BOX

- Top opening.
- Suitable for archiving TAB Top drawer files.

Archiving in your office...

Better space utilisation - frees space for your active files. Retention schedules should be put in place first to avoid unnecessary storage of documents. Good record keeping practice. Faster access to active information.
